

**Put America First.  
Buy America's First Pear.**  
**Available July-Oct**

When California Bartlett pears hit the market in early July, they'll be the first fresh pears harvested in America, produced in a state with the most stringent regulations in the world to protect the environment, farmworkers and consumers.

California pears  
are grown by  
farming families  
who live in, work in  
and support their  
local communities.  
They deserve our  
support.
